The Magic of Blown Glass

BALL

DESIGN BY
BRIAN RASMUSSEN

The glass diffuser of the BALL collection is blown by expert glass masters.
Each glass is unique; each glass is 100% Made in Italy/

Il vetro della collezione BALL è soffiato a bocca da esperti maestri vetrai.
Ogni vetro è unico ed è 100% made in Italy.

RIGADIN

Thin ribbing obtained by blowing a glass object
inside an open die, generally in bronze,
which has grooves with a triangular cross-section/

Decoro ottenuto soffiando la pallina
in uno stampo, in genere di bronzo,
che porta delle scanalature a sezione triangolare.
La pèa diventa costolata.

BALLOTON

Technique used to obtain a particular optical effect.
It is based on the use of a metal die, with the inner walls
containing small square based pyramidal “spikes” which,
when the glass is blown, result in a cross-relief pattern/

Tecnica usata per ottenere un particolare effetto ottico.
Si basa sull’uso di uno stampo in metallo
contenente all’interno delle punte a piccola piramide
a base quadrata che, nella soffiatura, danno un effetto
di rilievo incrociato.

each technique creates its own luminous effect

RIGADIN RITORTO

The piece thus becomes ribbed and
can also be twisted inside the mold
to produce rigadin ritorto
(swirl or twisted ribbing)/

Se il vetro viene anche ritorto
durante la stampigliatura
si ottiene il rigadin ritorto.

BULLICANTE

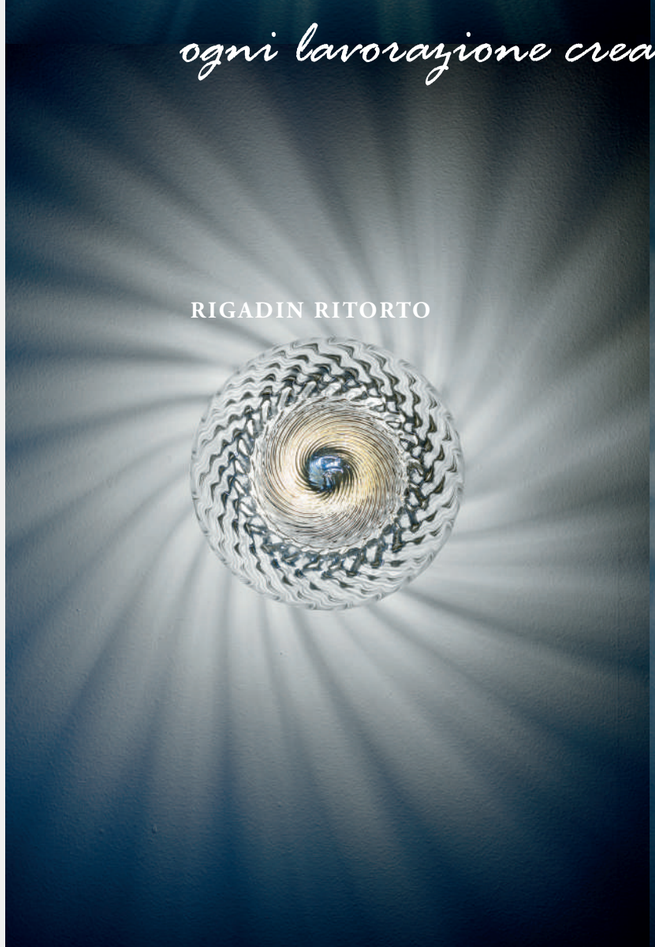

By casing a gather (péa) stamped in this way in a layer
(coperta) of glass, an effect is obtained whereby
hundreds of minute air bubbles are trapped
between two layers of glass/

Ricoprendo una péa, stampata a balloton,
con una coperta si ottiene l’effetto bullicante o a bolle,
consistente in una miriade di piccolissime bolle d’aria
rimaste intrappolate tra i due strati di vetro

ogni lavorazione crea il suo effetto luminoso
