ECLISSE
SPHERE

when the **BRILLIANCE**
of the **CRYSTAL**

meets the **ICONIC SHAPE**
of the **SPHERE**

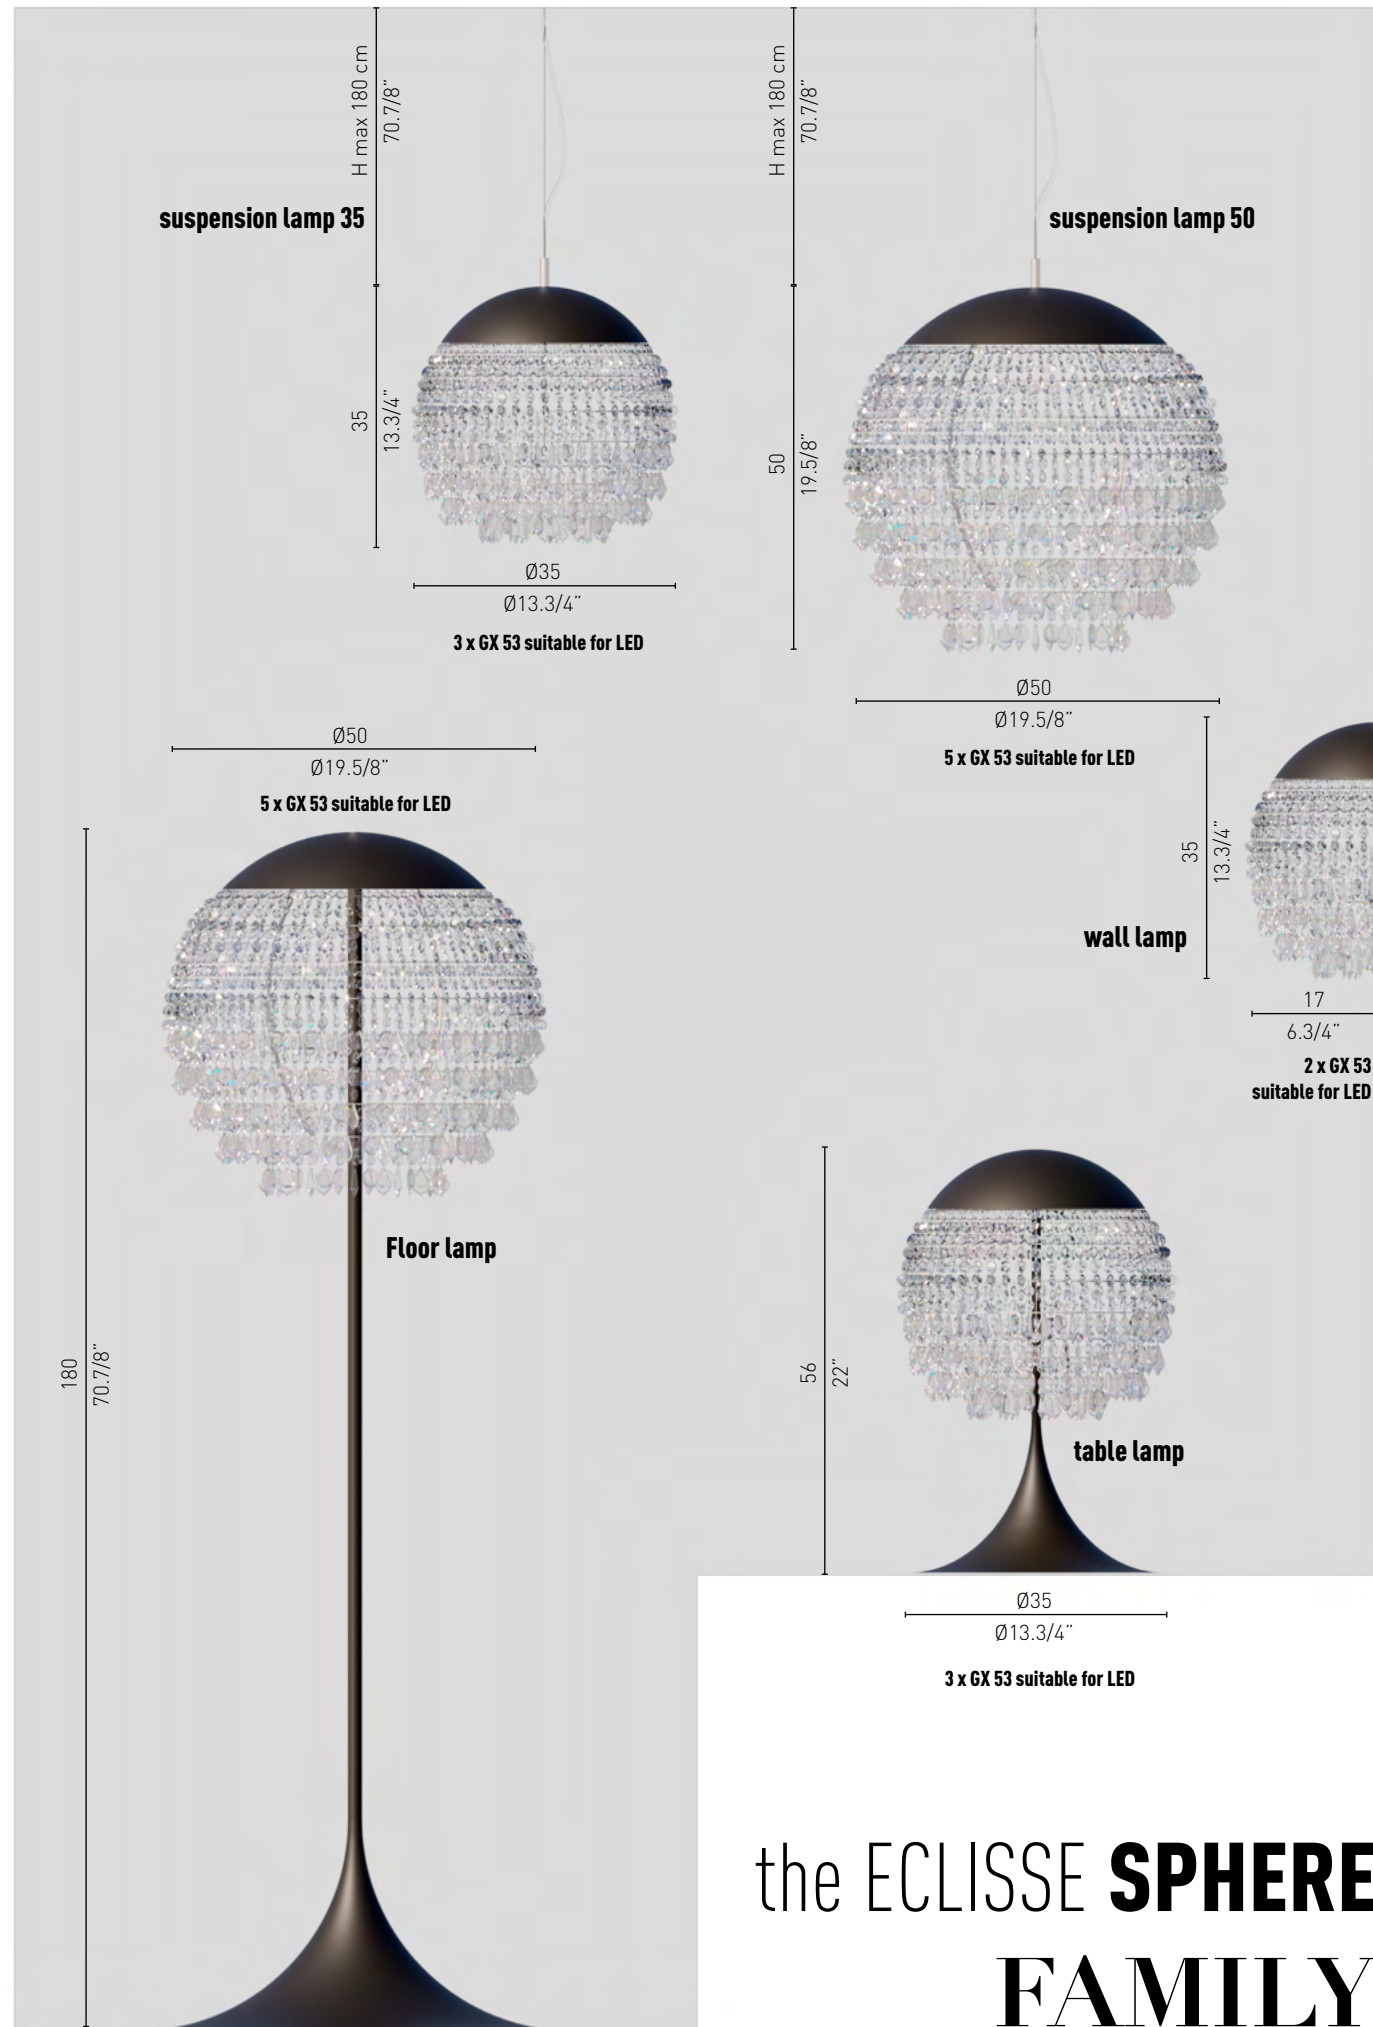

The metal dome of the ECLISSE SPHERE elegantly conceals the light sources and all technical components, ensuring a seamless appearance. The chromed metal structure, from which the exquisite crystal chains gracefully hang, remains clean and transparent, showcasing the crystal as the undisputed star of the design.

The sophisticated chromed finish enhances the overall aesthetic, as the metal virtually disappears amidst the dazzling reflections and refractions created by the crystal and light. This harmonious blend of materials and light results in a captivating and luxurious illumination piece that elevates any space.

La calotta metallica di ECLISSE SPHERE nasconde in modo elegante le sorgenti luminose e tutti i suoi componenti tecnici, offrendo un design impeccabile.

La struttura in metallo cromato, da cui pendono con grazia le raffinate filiere di cristallo, rimane chiara e trasparente, mettendo in evidenza il cristallo come protagonista indiscusso del suo design.

La sofisticata finitura cromata esalta l'estetica, poiché il metallo scompare in mezzo ai riflessi e alle rifrazioni creati dal cristallo e dalla luce. Questa miscela armoniosa di materiali e luce si traduce in un'illuminazione accattivante e lussuosa che esalta qualsiasi spazio.
